

INTERCHANGEABLE MULTIPURPOSE TRIPLE NOZZLE SPRAYER

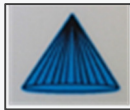

The Interchangeable Multipurpose Triple Nozzle Sprayer is provided with a handle that allows the liquid to flow for the gun operation. The customer can choose any handle model, interchangeable through the fast joint.

The choice of the nozzle is suggested by the images shown at the base of the body of the triple nozzle sprayer.

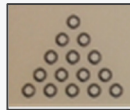

You can choose among

Cone jet

Fan jet

Foam jet

Turn the gun off before you change the nozzle: stop the flow through the handle. Once you have stopped it, hold the handle with one hand, place the other hand on the spraying body, rotate it and place it on the image of the chosen nozzle as in picture. Once you have selected the nozzle, you can start using the gun.

By choosing the Large or Foam jet, you have the chance of lengthen the spraying body, by pulling it outside, in order to create the Venturi effect: it increases the nebulization and makes the foam more gripping.

This sprayer was mainly conceived for the fire prevention industry, for which timing is essential: with this product, you can save time using the same sprayer without any nozzle change.

Our Multipurpose Triple Nozzle Sprayer can be easily equipped on water pressure washers or on foaming machines.

Considering the elevate power and high pressure, we highly recommend to use the Multipurpose Triple Nozzle Sprayer with two hands.

It can cause serious harm: do not use it against people or animals.
